

ECM Motors for Refrigeration

Unitronix & Arctic motors have been added to the Aireco product line.

Unitronix:

Electronically commutated motor that brings outstanding energy savings to the refrigeration market in the form of a direct drop-in replacement for practically all unit bearing motors.

- Generates less waste heat inside of refrigerated space & requires less electricity to operate than standard 9 watt shaded pole motors.
- High capacity oil reservoir spiral grooved shaft for efficient distribution of oil to the bearing surface.
- Electronic control board programmable to customer selected speeds.
- Mounting hardware.
- Water Shield.
- Standard rear mounting holes drilled and tapped.

Arctic:

Durable 3.3" diameter motor ideal for any commercial refrigeration walk-in.

- Special low temp lubrication system and rugged ball bearings.
- Automatic torque variation and ultra-high efficiency.
- Easy to install "Drop-In" replacement shaft water slinger.
- Standard thru-bolt configuration.
- All angle mount.
- RoHS compliant.
